SKILLS

React, Redux, Ruby, Ruby on Rails, JavaScript, Node.js, HTML, CSS, SQL, Docker, GraphQL, Apollo, MongoDB, Express, HTML5, CSS3, AWS, Git, jQuery, RSpec

PROJECTS

FIDELITY FOG (React, Rails, PostgreSQL)   live | github

FidelityFog is a clone of the popular SoundCloud and uses Ruby on Rails, PostgreSQL, React, and Redux.

- Deployed custom authentication with Ruby on Rails that uses BCrypt and ActiveRecord to store hashed and salted passwords and unique tokens for persistent user sessions.
- Achieved audio file upload using AJAX, ActiveStorage, and AWS to store client submissions
- Created responsive track bar UI using custom React components that are connected to a Redux global store that allows for uninterrupted audio playback across multiple client re-renders

CODE DUELER (React, GraphQL, Apollo, MongoDB, Node.js)   live | github

Code Dueler is a combination of TypeRacer and Leetcode that uses MongoDB, Express, Apollo, GraphQL, React and Node.js.

- Implemented a global chat room using React components and Websockets using Apollo subscriptions and MongoDB message and user collections.
- Designed unique UX including a custom text editor that features syntax highlighting for user code submissions sent for processing by Google Cloud Functions, that return results and errors that are then relayed to React components in real time.
- Utilized Docker containers for efficient development, testing, and updating as well as system agnostic deployment.

ROO MAP (JavaScript, HTML5, CSS)   live | github

Roo Map is an interactive map of Bonnaroo Music and Arts Festival that uses vanilla JavaScript, HTML5, and CSS3.

- Transformed standard PDF map into an interactive guide using JavaScript and DOM to calculate cursor position relative to screen and page for precise animations.
- Optimized layout across all device types using CSS flexbox and media queries to present a responsive, seamless UX.

EXPERIENCE

Kitchen Manager

Murray's Irish Pub   Jan 2017 - Aug 2019

- Prepared and plated dozens of orders each 6 hour shift while operating a grill, fryer, and oven through efficient time management and delegation, ensuring a standardized high level of quality at all times.
- Maintained quality of hundreds of pounds of fresh ingredients at a time through regular inventory inspections, while concurrently adhering to food and safety standards and regulations.

Healthcare Specialist

US Army Reserve   Oct 2008 - Oct 2016

- Ensured the deployment immunization readiness of thousands of soldiers attached to the 1st Cavalry Division in Fort Hood, Texas over a one year period.
- Performed yearly skill assessments at facilities that are designed to recreate a chaotic combat scenario and realistic traumatic wounds using state of the art wound simulations.
- Earned civilian Emergency Medical Technician certifications and trauma specific Army medical certifications.
- Awarded for expert marksmanship with an M16.

EDUCATION

Web Development - *App Academy | Spring 2020*
